EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. The application has been amended as follows: A period (.) has been inserted after the term "material" in the last line of claim 21 for grammatical clarity.

Allowable Subject Matter

3. Claims 1, 3-8, and 10-21 are allowed.

4. The following is an examiner's statement of reasons for allowance: The prior art does not teach or suggest a balance weight assembly having a polymeric body with a metal clip providing a hook portion having a cross-sectional shape that corresponds to the flange edge portion of a wheel rim and is partially embedded within the body, the body further having an elongated cavity for holding a separate elongated high-density weight, which is secured in the cavity by an adhesive fill material, wherein the cavity opens towards the wheel to prevent escape of the weight when the assembly is mounted.

The prior art also does not teach or suggest a balance weight having a one-piece molded polymeric component having a clip portion having a cross-sectional shape that

Art Unit: 3617

corresponds to the flange edge portion of a wheel rim to fit the balance weight to lie in contact with the inner surface of the rim flange, and a hollow body portion including a cavity proportioned to accommodate a high-density weight in a manner that inadvertent separation is prevented.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Flebbe reference is considered to show a balance weight having a weight attached to a clip body.
